

NightTrader Pitch Deck

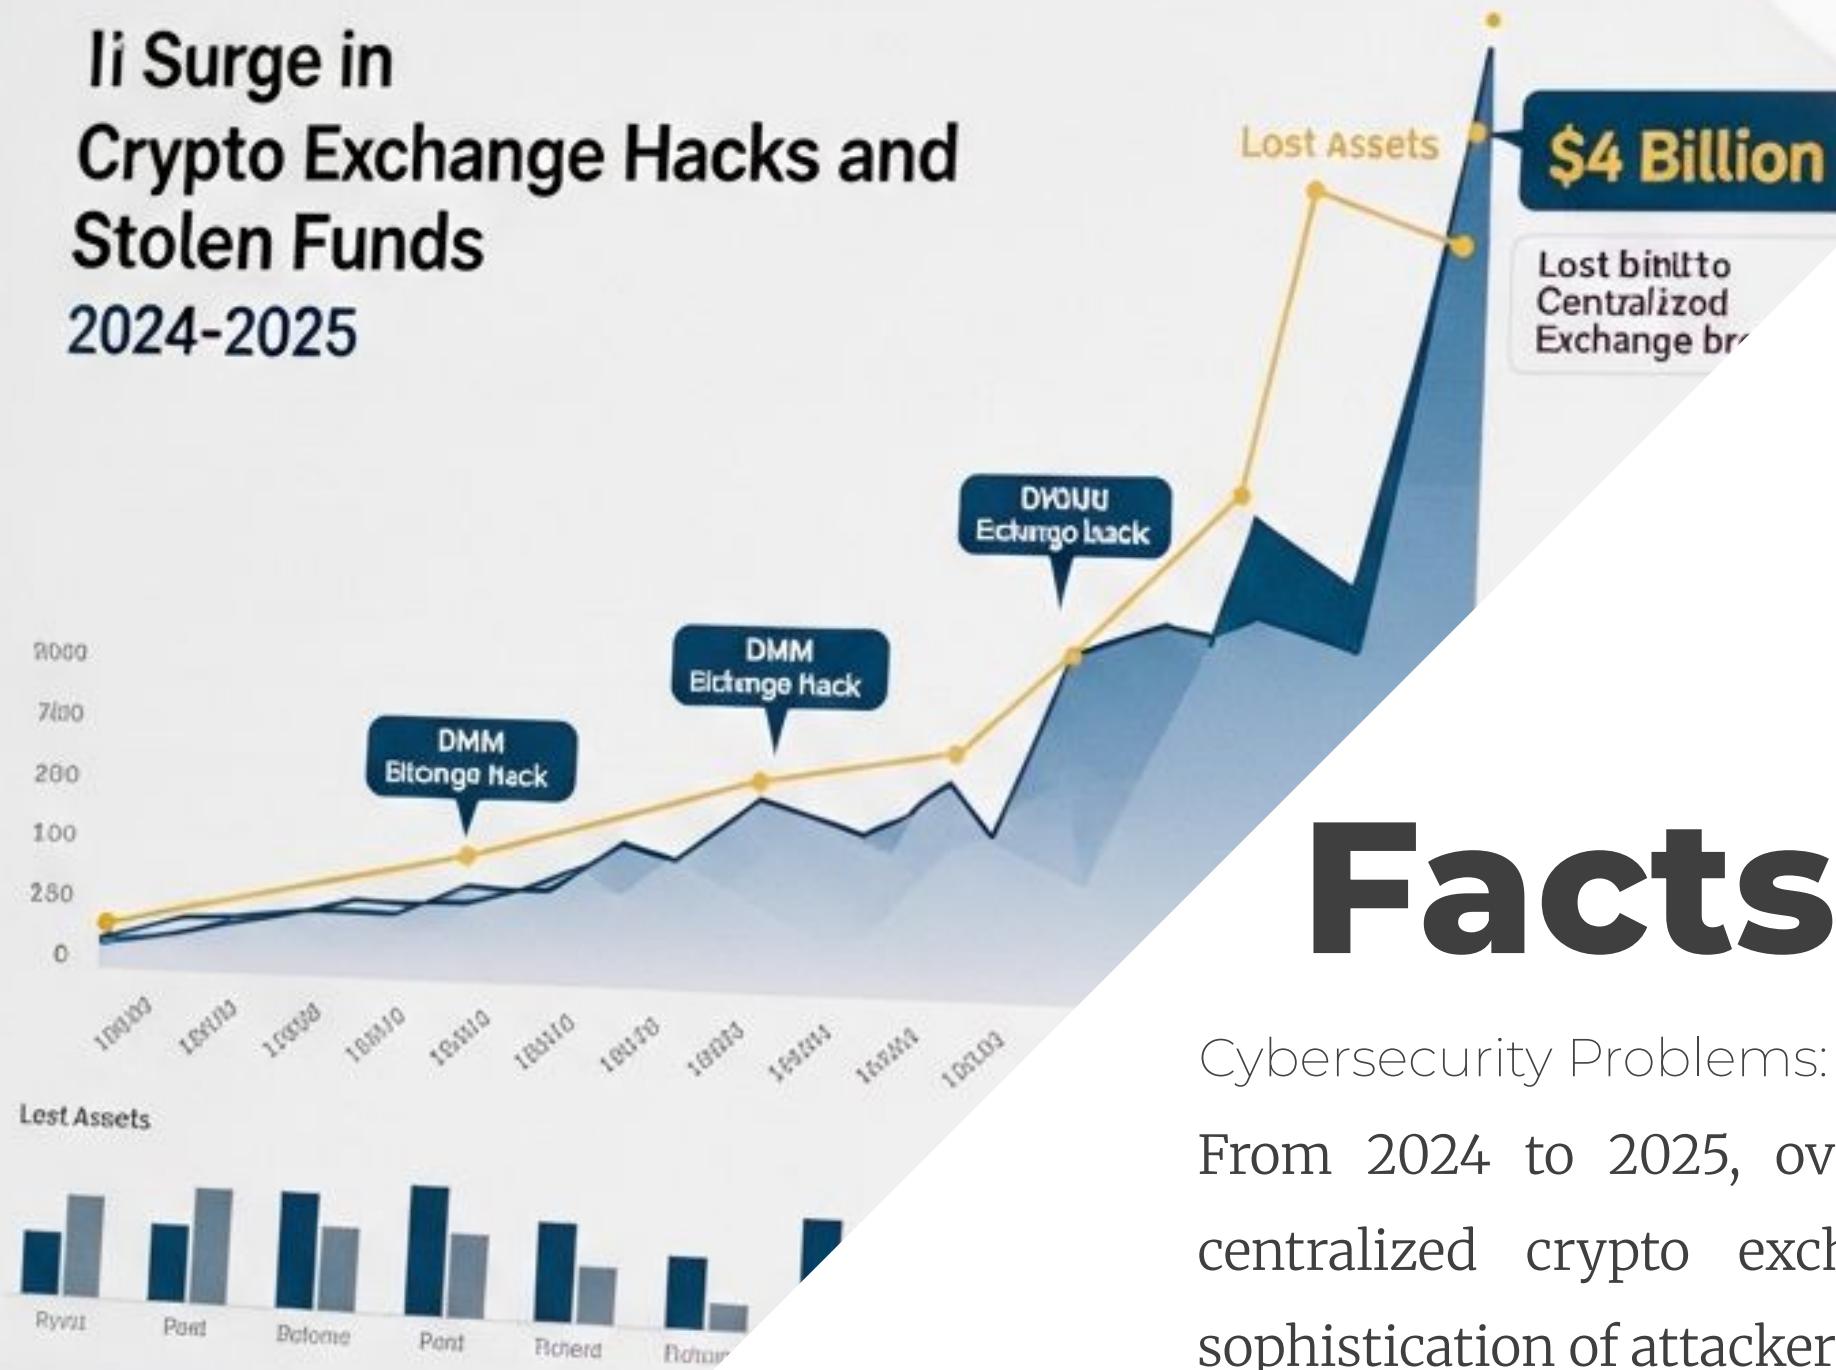

Bitcoin Native
Decentralised
Multisignature
Exchange

Seeking \$2M Pre-Seed for Secure DEX Growth.

Summary

A Surge in Crypto Exchange Hacks and Stolen Funds 2024-2025

Facts

Cybersecurity Problems:

From 2024 to 2025, over \$4 billion in user funds have been stolen across centralized crypto exchanges, driven by record-setting hacks and rising sophistication of attackers.

Source: chainalysis.com/blog/2025-crypto-crime-mid-year-update/

Wealth growing fast:

In 2024, blockchain assets surged to a record \$3.25 trillion market capitalization, underscoring rapid growth and mainstream adoption of crypto worldwide.

The Problem: Stolen, Lost & Forgotten.

Over 18% of all Bitcoins—more than 3.7 million coins—are permanently lost or stolen, while centralized exchanges continue to face frequent hacks, posing ongoing risks to user funds.

Source: cointimeatm.com/how-much-unclaimed-bitcoin-is-there/

In 2021, a retired man who had saved diligently over 60 years invested his life savings—over \$300,000—into cryptocurrencies via reputed exchanges. Unfortunately, he fell victim to an elaborate crypto fraud. Despite his sincere hopes, he lost his entire savings. This profound financial and emotional devastation is a harsh reality for many crypto users, underscoring the urgent need for secure, reliable exchange solutions like NightTrader's decentralized and recoverable multisignature wallets.

The Solution: Multisignature

**Auditable,
Recoverable,
Decentralised**

From a technical perspective, multisig wallets are secure as no single key can be compromised nor third parties can steal them; hacking risks are drastically reduced through decentralized custody and cryptographic protections.

- **Lost keys don't mean lost funds**—advanced recovery mechanisms ensure users or exchanges can eventually restore access to assets.
- **Built for high-speed, low-cost trading**, the decentralized platform seamlessly supports both UTXO and ERC-based cryptocurrencies for broad compatibility and efficiency.

n-ethereum-is-hidden-in-plain-sight-at-this-landing-page-4293027](http://uk.investing.com/news/cryptocurrency-news/thousands-of-dollars-in-ethereum-is-hidden-in-plain-sight-at-this-landing-page-4293027)

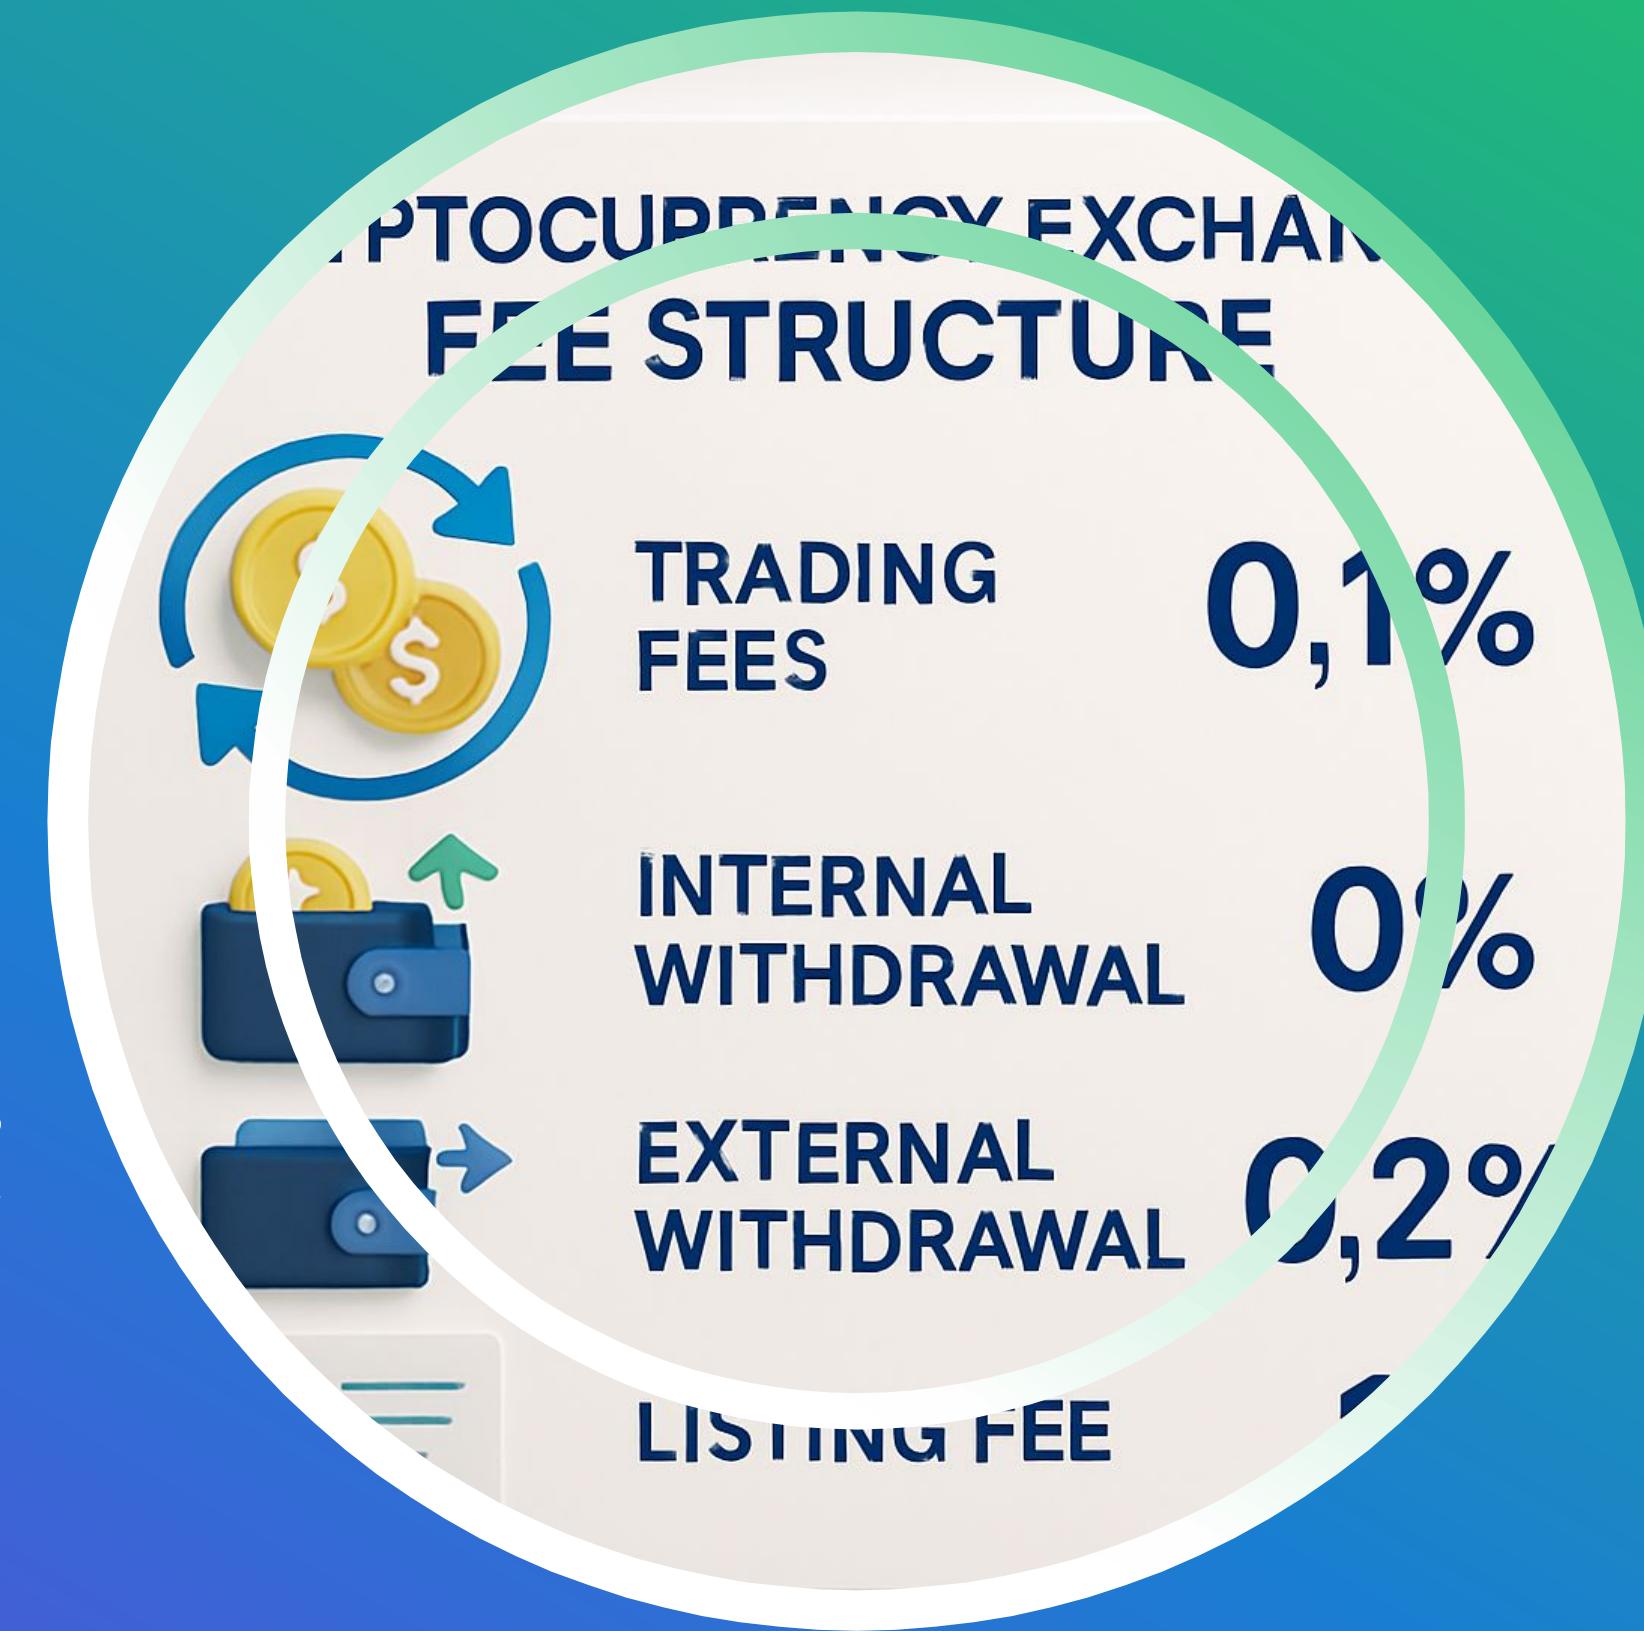

Accelerating Revenue Growth

- Competitive **trading fee** of 0.125% per completed trade
- Low **withdrawal fees**: 0.1% for internal transfers, 0.5% for external wallets
- **Min. 50k fee per Listing** applied for integration and auditing of contracts and coins

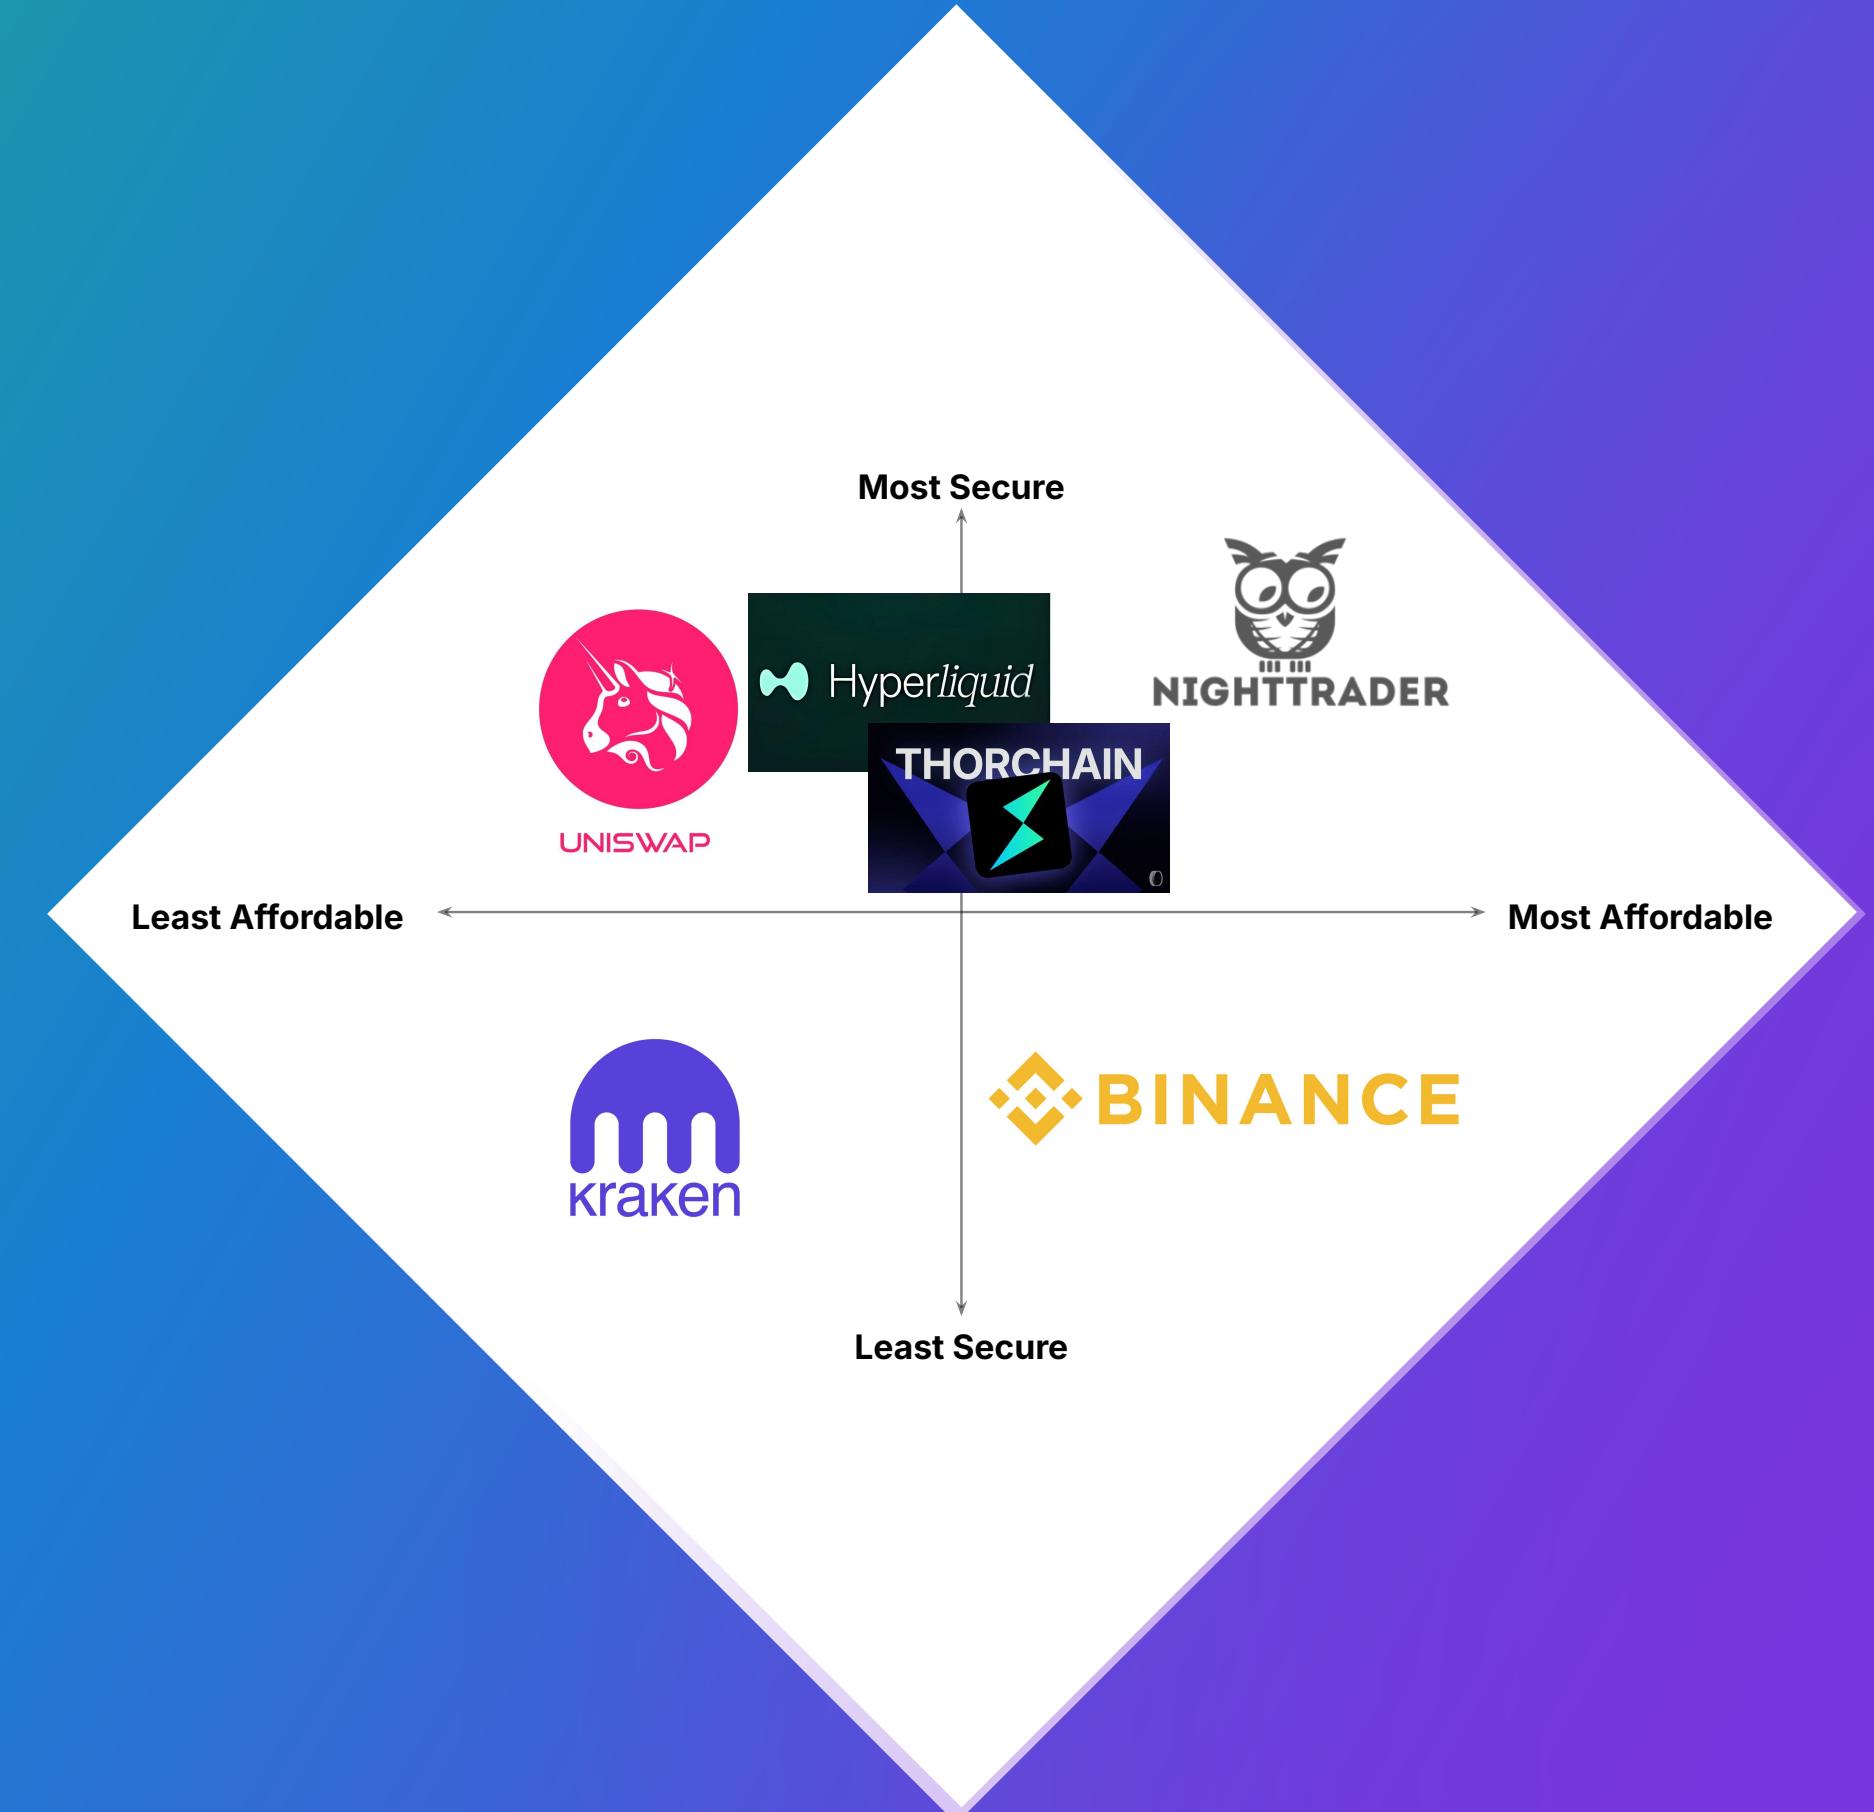

NightTrader is poised for rapid revenue growth, driven by its unique decentralized Bitcoin trading platform, competitive fees, and proven user adoption. We project scalable fee income aligned with a 12.8% industry growth rate, targeting profitability within two years, with listing fees and network grants perhaps earlier.

Average customer acquisition cost (CAC) for crypto exchanges ranges from \$40 to \$125, while lifetime value (LTV) per user is about \$890. Strong community marketing can reduce CAC by 45% and increase user retention, making growth sustainable and profitable. TAM \$63B → SAM (DEX) \$10B → SOM 1% = \$100M.

Competition

Night Trader offers secure, lightning-fast, decentralized trading of native Bitcoin and UTXO coins with multisignature custody, time-locked fund recovery, and zero reliance on wrapped tokens, outperforming Uniswap, Binance, and Kraken in security, speed, and native asset compatibility."

CRYPTO MARKET

HISTORIC ALL-TIME HIGHS

INVESTOR DEMAND

OVER 5,000 TOKENS TOKENIZED

Market View

Meet Ana, a Brazilian trader who lost \$43k in a hack but now trades securely and swiftly on NightTrader with multisig wallets!

The global cryptocurrency exchange market is projected to reach around \$29.4 billion in 2025, growing at nearly 20% CAGR. North America holds about 40% of this market, followed by Europe and Asia Pacific. With millions of active users and rising adoption, a startup like NightTrader targeting 100,000 traders with a 0.125% trading fee could tap into substantial revenue potential and scale as the market expands.

- Historic ATHs and strong investor demand drive DeFi market cap toward \$2 trillion, signaling robust growth potential
- Security remains paramount with crypto theft totaling \$20.6 billion, pushing focus on safer trading solutions
- Crypto asset diversity expands rapidly with over 5,000 assets fueling tokenization and NFT market innovation.

Our Team

Great work ethics. Working since years relentless!

Besides the core team, our advisors consist of

Borja Vasquez, a seasoned CFO, Barktek Probola, a Chartered Financial Advisor & M.D. David Dixon, a serial entrepreneur.

Alec Hahn
CEO

Over 20 years of entrepreneurial experience in the tech industry. Co-conceived NightTrader vision in 2014, pioneering in the crypto exchange space. A visionary leader with extensive blockchain knowledge.

Oleksandr Iakovliev
CTO

Expert software architect with a focus on high-load systems. Head programmer and architect of the NightTrader Exchange. Innovative thinker with a strong grasp of blockchain technologies and cryptography.

Craig Claussen
QA

Experienced in project management and software testing. Community manager and social media strategist with a focus on user engagement. Passionate about decentralization and market analysis.

Nickolas Abraham
COO

Engineering Technician, Power Plant Operator, Control Room Operator, Operations Specialist. Diverse background with extensive certification in mechanical, electrical, and electronic systems.

David Zimbeck
Advisor

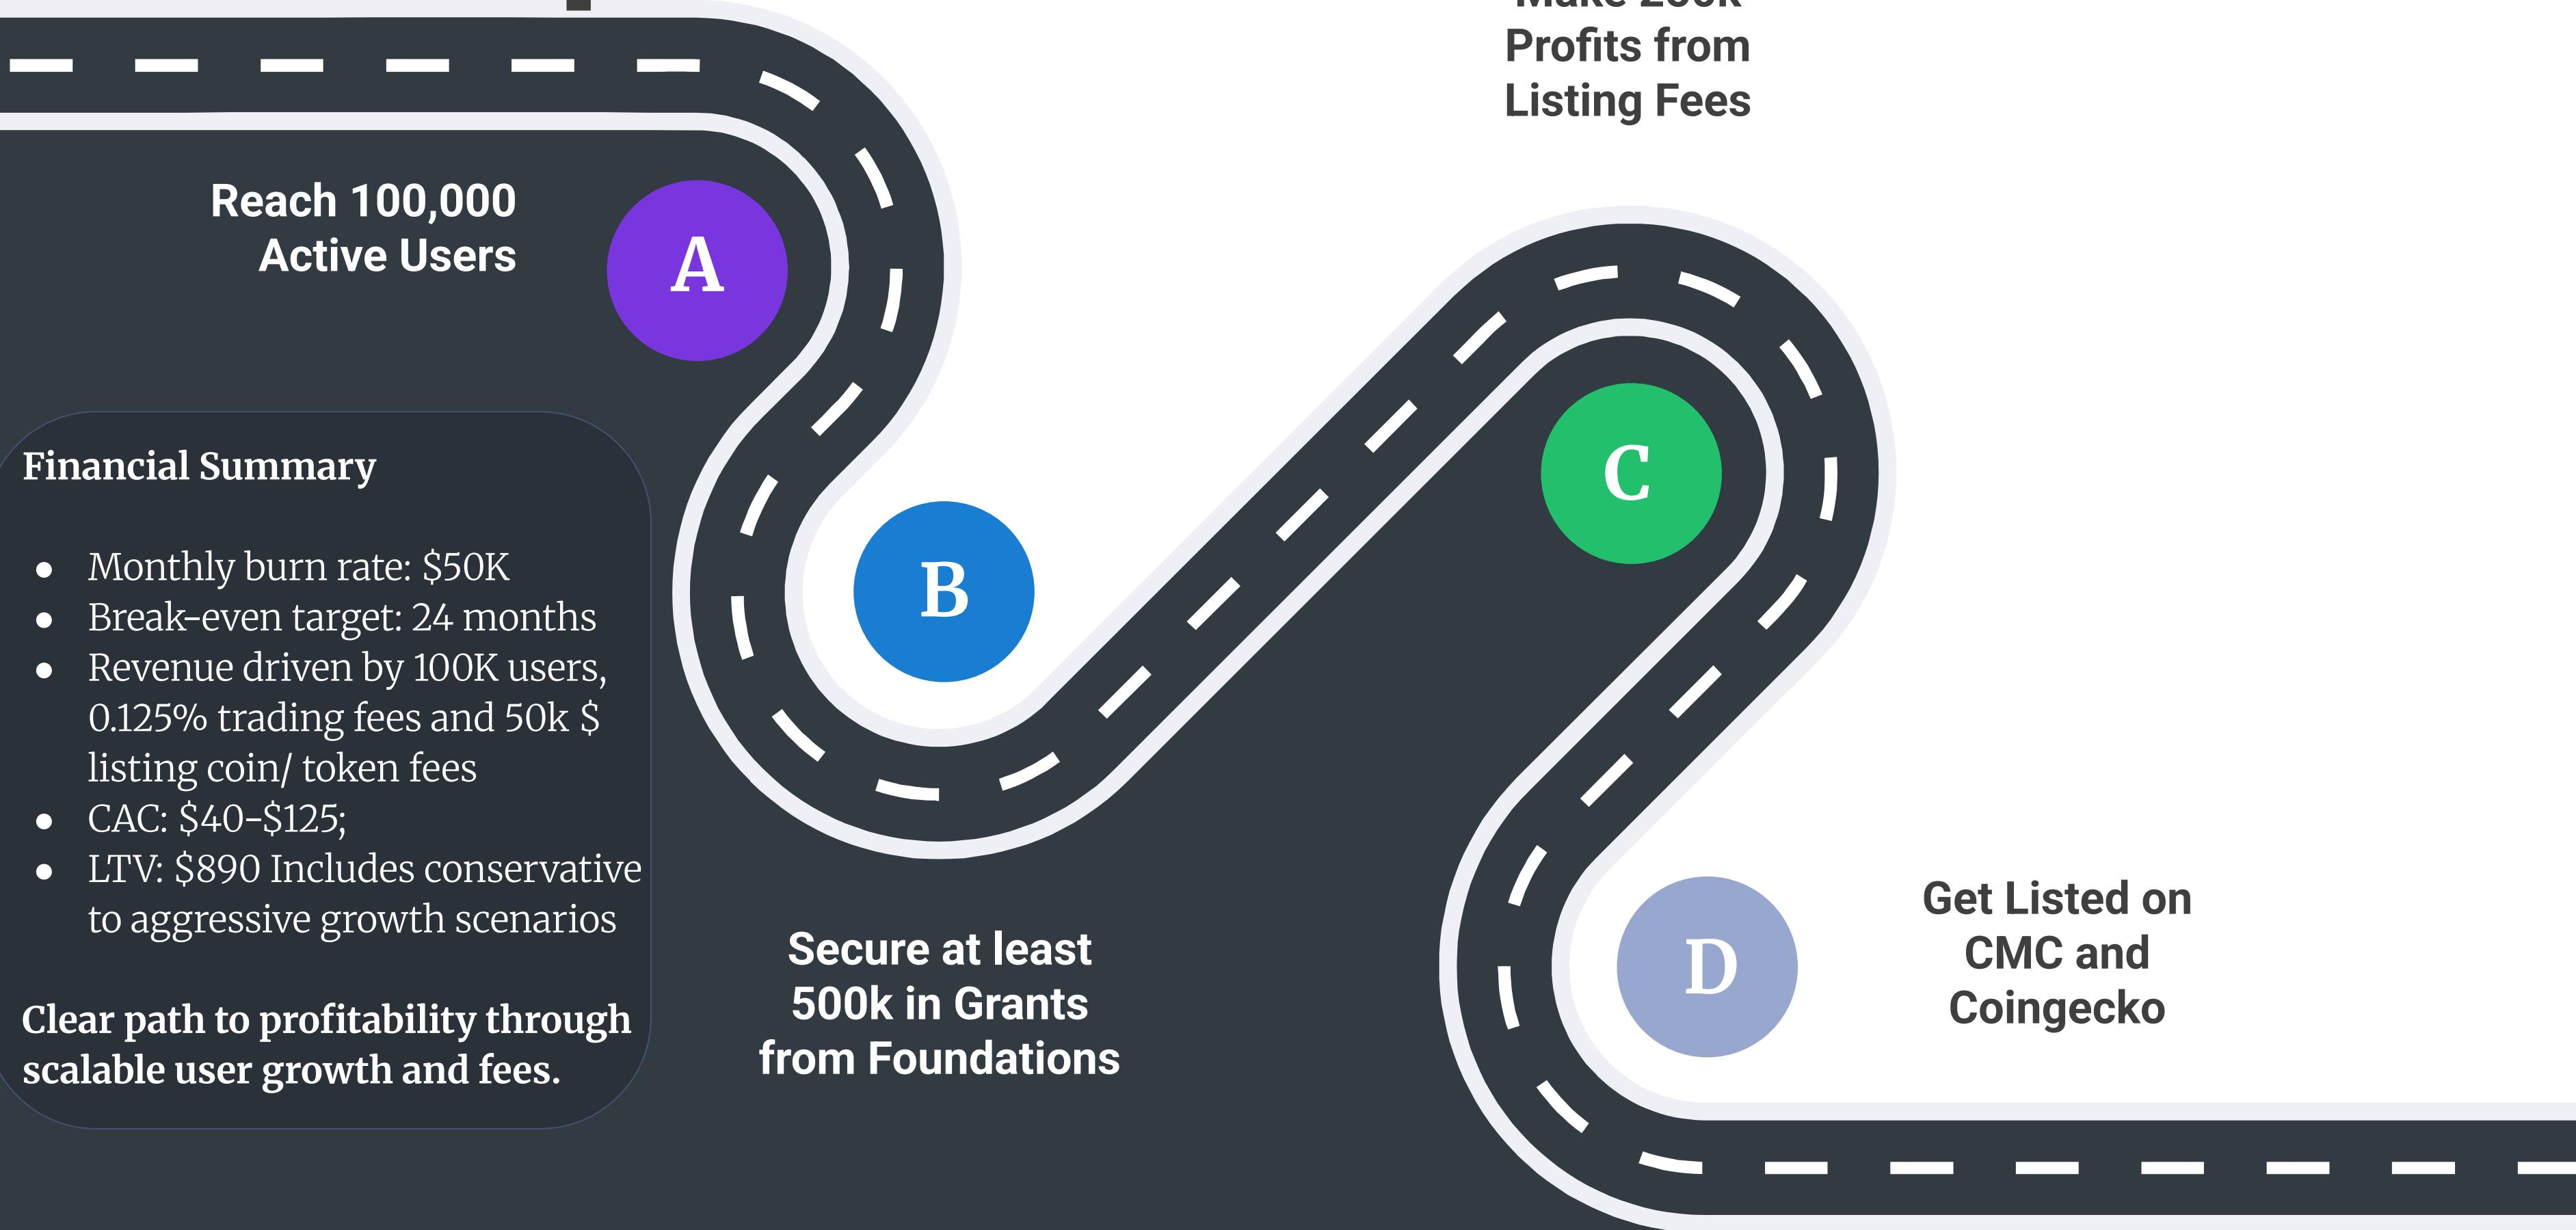

Master Chess Player, Production Company Producer, Real Estate Broker, Film Actor, and Developer. Head Developer of the BitHalo Protocol and the BitBay Dynamic Peg. Expert Cryptologist.

Our Exchange

We have a day and night version, as well more front end designs being worked on. Try it out on:

Roadmap

Investment

We are in the Pre-Seed stage of Investment, and are seeking venture capital.

2 Million (at 10M evaluation) Investment will enable:

- Platform development and enhancement
- Initial user acquisition and community building
- Ensuring regulatory compliance and legal fortification

Why now?

- Innovative security features set to disrupt the market.
- 3 years of successful alpha testing with 300+ Users.
- Secured internally \$350k in initial funding.
